

better products for a cleaner environment

TYPHOON

Superior Vacuuming Performance

Typhoon

Industrial vacuum cleaners with classic polished stainless steel tanks provide excellent cleaning results for both wet and dry use. Designed with user-friendly ergonomics, incorporating high-powered motors and built with quality materials and workmanship. These machines guarantee superb performance, provide maximum reliability and ensure long service life.

Their advanced specifications and purpose matched accessories make them particularly suitable for any cleaning and water removal jobs in the most demanding environments such as workshops, factories and construction sites.

TYPHOON 432

It is a compact, lightweight unit on castors for easy pushing or even carrying around, making it ideal for small commercial or light industrial applications. Despite the small size, its powerful motor is suitable for sucking up most materials such as dirt, grease and soiled water, while its steel tank is highly resistant to abrasion and external aggression.

Effective removal of dirt & fluids alike.

Excellent accessibility for hard to reach places.

TYPHOON 463

It uses the workhorse of 2-motor machine to meet the heavy demands of contracting work. It is mounted on an ergonomically designed chassis with sturdy well positioned handles, rotating front castors and large rear wheels for easy transportation, even over kerbs and steps, while its discharge hose provides effortless, no-spill emptying of tanks.

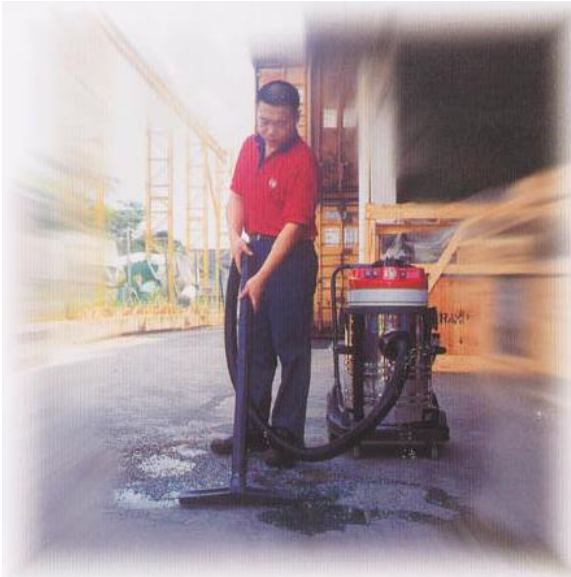

Effortless pick up with fixed floor nozzle

Various accessories to suit different applications.

TYPHOON 678

It has the 3 vacuum motors to deliver the maximum suction power for the heaviest, most demanding applications. In addition, its 78 litres tank capacity allows for the removal of large volumes of dirt and liquid at one go. Despite its top-of-the-line performance, this machine still incorporates the ergonomics and water discharge hose of the Typhoon 463 for great maneuverability and general ease of use.

3 motors for maximum suction power.

Industrial strength machine for heavy duty applications.

TYPHOON 480P

It is the perfect solution for removing particular large deposits of water. It is equipped with an integrated immersion pump that allows simultaneous discharge of tank while vacuuming. Typhoon 480P is thus ideal for removal of extremely large or accumulating amounts of water caused by heavy rain or broken pipes.

Built-in immersion pump allows for.....

..... simultaneous vacuuming & water discharge
