

LAVA

Autoscrubbers deliver effective and efficient floor cleaning performance. This new generation of machines is constructed with quality materials, incorporates numerous useful features and is supported by the high standard of service you can expect.

Wash and dry hard floors in a single pass, saving labour as compared to the 2-man rotary scrubber and vacuum cleaner method. With the range of models available, there is a LAVA Autoscrubber suitable for every cleaning job.

LAVA

351

Other than having a sleek and compact design that improves maneuverability in tight areas and a height adjustable handle that folds down remarkably for easy storage, **LAVA 351** scrubs and dries the floor at one go without any hassle. Being versatile, high productivity and superb quality, this machine is the answer to all your cleaning needs in canteens, food court, restaurant, cafeterias, hawker centres and any dining areas.

LAVA

501

LAVA 501B & C are workhorses for small to mid sized commercial applications. Thorough cleaning is achieved with up to 30kg brush down pressure, while the floating V-type squeegee effectively dries tiled and uneven floors. Hands-free latching/ release of brush or pad holder and tool-free change of squeegee blades all add up to simple maintenance and maximum productivity.

LAVA

550B

Besides having an excellent weight distribution, the great capacity tank and scrubbing width of **Lava 550B** are enough to outshine its uniqueness as a Walk-Behind Scrubber Drier. This ergonomic machine aims to maximize work by ensuring uniform washing and perfect drying of the floor surface in a unique time. It is designed to offer high level performances from having soundproof system at low noise to tool-free assembly. Great visibility and easy-to-use control panel also makes maneuvering safe and comfortable for the operator.

Easy to use control panel
Solution flow starts/stops upon brush command. Indicates empty solution tank and full recovery tank. Switches protected against water.

Tough HDPE tanks
Virtually indestructible body. Recovery tank can be tilted and washed easily

Exclusive squeegee system

Impact resistant, high performance wheeled squeegee. Quick and easy tool-free blade change. Blades can be rotated 4 ways before replacement.

Anti Foam System
Protects motor against foam. Sensor turns off vacuum fan when recovery tank is full.

Filters
Inlet and outlet filters to protect solution dispensing system.

Motor Protection
Oil bath reduction gear box provides soft start for maximum motor protection.

Constant Weight System
Constant brush pressure provides uniform, efficient washing.

Tools Free
No tools required when replacing brush.

Tips on maintaining your Autoscrubbers!

- Check battery water on a weekly basis
- Charge batteries after usage
- Clean all filters regularly
- Inspect and clean squeegee for great pick up performance
- Empty and rinse the recovery and solution tanks
- Detach squeegees and brush/pad when stored

better products for a cleaner environment
